

# ZAID DUARTEE

## CTO • TECHNICAL LEAD • PRODUCT & ENGINEERING

Islamabad, Pakistan • [zaidduartee@gmail.com](mailto:zaidduartee@gmail.com) • [linkedin.com/in/zaidduartee](https://linkedin.com/in/zaidduartee) • [github.com/ZAIDDUARTE](https://github.com/ZAIDDUARTE) • [zaidduartee.com](https://zaidduartee.com)

### PROFESSIONAL SUMMARY

Technology leader with a hands-on engineering background across data-intensive platforms, SaaS and geospatial systems. Leads technical direction from ambiguous requirements through architecture, delivery, quality assurance and stakeholder alignment. Experienced in turning research-heavy and early-stage concepts into structured, auditable products and working effectively across product, engineering and data.

### WORK EXPERIENCE

#### CTO / Technical Lead — Beyond Intelligence

Mid-2025 - Present

- Own technical direction and execution across risk intelligence, healthcare, geospatial, infrastructure and SaaS initiatives, working from product and research requirements through delivery.
- Translate scientific and commercial requirements into architecture, delivery plans, data contracts, APIs, cloud workflows and clear implementation priorities for engineering work.
- Led ATLAS, a governed environmental and property-risk platform integrating climate, atmospheric, terrain, property and hazard data for healthcare and insurance validation.
- Shaped MarginAI and environmental-health initiatives across product architecture, system safeguards, data workflows, provenance, risk logic, authentication, metering and reliability requirements.

#### Lead Full-Stack Developer — Freelance / International Clients

2025

- Led end-to-end delivery for international clients across SaaS and web products, owning scoping, implementation, integrations, client communication, QA and handover.
- Built full-stack products with React, Next.js, Flask and REST APIs, including a personalized wellbeing assistant with state, memory-oriented workflows and cloud deployment.

#### Frontend Lead Developer — Beachy Marketing

2024

- Led frontend delivery for client and product work, translating design and business requirements into responsive interfaces, integrations and iterative releases.

### SELECTED LEADERSHIP WORK

**ATLAS — Environmental Risk Intelligence Platform:** Directed engineering across geospatial pipelines, reproducible risk scoring, cloud provenance, validation workflows and production QA.

**MarginAI — LLM Infrastructure Optimization:** Defined a drop-in API proxy and product architecture focused on safe cost optimization, transparent metering and reliable pass-through behavior.

**Noesis — Environmental Health Intelligence:** Led technical design across geospatial processing, environmental time series, interpolation, confidence controls, QA and model-ready data preparation.

### SKILLS

**Leadership & Product:** Technical strategy, solution architecture, product scoping, delivery planning, stakeholder alignment, cross-functional coordination, QA and governance.

**Engineering & Systems:** Python, FastAPI, Flask, REST APIs, PostgreSQL/PostGIS, React, Next.js, TypeScript, data pipelines and geospatial systems.

**Cloud & Data:** AWS, S3, Docker, Parquet, Pandas, NumPy, GeoPandas, GitHub and reproducible data workflows.

### EDUCATION

LLB — Capital University of Science & Technology

In Progress

BS Data Science — Virtual University of Pakistan
